PVG whole flame retardant conveyor belt, PVG conveyer belt, conveying belt manufacturer

Brand Name : AKE
 Item Name : **PVG Conveyer Belt**
 Quality System : ISO9001:2000, CE
 Delivery Time : < 15 days
 Place of Origin : Shanghai China
 Rating : 4.7 score, 357 vote
 Price : [Get Price & Support](#)

■ PVG whole flame retardant conveyor belt Features

No delamination with body, excellent impact resistance to tearing, elongation and tear resistance. More wear, friction coefficient, big lift height than all plastic product about 2-6 times. Easy maintenance, the edge is not easy to wear, with a soft body, into a good groove, straight run good, reliable connection, long service life.

According to the structure can be divided into type PVC, type PVG (based on the increase in PVC with rubber surface) with a whole flame retardant solid band. PVC is suitable for the following 16-degree angle material handling under dry conditions. PVG type is applicable to dip below 20 degrees water wet material handling.

■ PVG Conveyer Belt Applications

For coal mine and other requirements retardant places. Retardant conveyor belt is mainly used for conveying high temperature materials such as sinter, hot coke cement clinker , hot castings etc..According to the main performance of resistance to tropical breakage and different heat resistance level , were done using EPDM or SBR as rubber cover; High strength and high permeability of polyester canvas or cotton canvas make brute force layer. Cover the glue and the skeleton layer can be laid heat-resistant glass cloth, in order to improve the resistance using life.

Request for Quotation

You can get the price list and a AKE representative will contact you within one business day.
